

# GRAEME ANDERSON

GMANDERSON05@GMAIL.COM | 860-575-5210 | AMES, IA

WWW.LINKEDIN.COM/IN/GRAEME-ANDERS

## OBJECTIVE

Cybersecurity Engineering student seeking internship or entry-level opportunities in IT security, SOC, or OT/ICS security within the power and utilities sector — available Summer 2027 or sooner.

## EDUCATION

**Iowa State University- Ames, IA**

**Anticipated Graduation - May 2027**

*Bachelor of Science- Cyber Security Engineering - GPA 3.82*

Study Abroad: University of Limerick, Ireland – Spring 2025

## RELEVANT EXPERIENCE

**Central Iowa Power Cooperative — Ames, IA**

**May 2026 – August 2026**

*IT and Business Intelligence Intern*

- Performed grey-box network reconnaissance across 12 member sites using Cisco FMC, switch CLIs, and Bomgar; designed a custom Excel-based network inventory system integrated with a Visio template
- Provided Tier 1 helpdesk support, including desk/workstation setup, and managed email security using Mimecast – reviewing quarantined attachments and investigating phishing reports
- Documented methodologies, refresh schedules, and data connections for ~260 Power BI reports; built an automated SQL / Power Query / Power Automate Desktop / PowerShell pipeline to generate SSIS job documentation across multiple servers
- Prepared semantic models for Microsoft Copilot integration, including data schema selection, verified answers, and AI instruction configuration

**Iowa State University — ITS NetOps Team, Ames, IA**

**June 2025 – May 2026**

*Technical Assistant – Student Worker*

- Completed 75+ audits on network cabinets across campus, analyzing port-to-jack discrepancies and locating missing connections
- Assisted in transferring 8,000+ records as part of a 10+ month networking systems transition project

**Iowa State University — CPRE 3810, Ames, IA**

**Spring 2026 – Present**

*Teaching Assistant, Computer Organization and Assembly Level Programming (under Dr. Henry Duwe)*

- Led lab sections, office hours, and in-person demos supporting students in designing a RISC-V-capable CPU, covering datapath/control, pipelining, and instruction set design
- Graded homeworks and lab reports and supported students working in Red Hat Linux, QuestaSim, VHDL, and Assembly

## PROJECTS

**ISU Cyber Defense Challenge — 3rd year participating**

**October 2024 – Present**

- Configure a network of machines with varying services and operating systems as part of a small team each year
- Participated in active defense of the network against attacks from ISU alumni and industry professionals in this annual competition

**Senior Capstone Project**

**Fall 2026 – Present**

- Cybersecurity engineering capstone in progress; scope and deliverables to be finalized in early Fall 2026

## SKILLS AND CERTIFICATIONS

|                                 |                                                                                             |
|---------------------------------|---------------------------------------------------------------------------------------------|
| <b>Operating Systems:</b>       | Linux (Red Hat, Ubuntu, Parrot, Kali), Windows, macOS                                       |
| <b>Security Tools:</b>          | Cisco FMC, Cisco Cyber Vision, Mimecast, Wireshark, Nmap                                    |
| <b>Programming / Scripting:</b> | Python, C, Java, SQL, PowerShell, VHDL, Verilog, Assembly (ARM v8, RISC-V)                  |
| <b>Networking / IT Tools:</b>   | Cisco Packet Tracer, VMWare, GitLab, Bomgar                                                 |
| <b>Data &amp; Automation:</b>   | Power BI, Power Automate Desktop, SSIS, Power Query                                         |
| <b>CompTIA Certifications:</b>  | A+ (Aug 2024), IT Fundamentals+ (Aug 2022), Network+ (In Progress), Security+ (In Progress) |
